CLAIMS

1 1. (Currently Amended) A rebar spacer comprising, 2 a clip having a bottom portion with a semicircular "U" shaped rebar cradling portion, having a circumference, a diameter, and a center, 3 a pair of columns one on either side of the semicircular "U" shaped rebar cradling 4 5 portion and extending upward therefrom, 6 a cross portion on each column extending toward the opposing column, 7 an a straight arm extending angularly downward from each cross portion toward the center of the semicircular "U" shaped rebar cradling portion and having an end 8 9 proximate the circumference on the diameter opposite at a distance approximately the diameter the semicircular "U" shaped rebar cradling portion from the opposing wall of 10 the semicircular "U" shaped rebar cradling portion, such that end has a flat surface 11 12 approximately perpendicular to a cradled rebar circumference, to prevent an inserted rebar from being removed from the semicircular "U" shaped rebar cradling portion, 13 14 a base portion attached to the base of the clip for supporting the clip at a desired 15 height. 1 2. (Original) A rebar spacer as in claim 1 wherein, 2 the base portion has a flat base, 3 a left wall extending from the flat base to the bottom of the clip and center wall 4 extending from the base to the bottom of the clip and a right wall extending from the flat 5 base to the bottom of the clip.

- 1 3. (Original) A rebar spacer as in claim 2 wherein,
- The left and right walls are slanted inward from the edge of the flat base to the
- 3 sides of the clip, and the center wall is perpendicular to the flat base and the base of the
- 4 clip.
- 1 4. (Withdrawn) A rebar spacer as in claim 2 wherein,
- a cross wall extends between the flat base and the bottom of the clip, between the
- 3 right wall and the center wall and between the left wall and the center wall.
- 1 5. (Withdrawn) A rebar spacer as in claim 1 wherein,
- a left leg extending from the bottom of the clip, center wall extending from the
- 3 bottom of the clip and a right leg extending from the bottom of the clip,
- 4 a cross brace from the center wall to the left leg and a cross brace from the center
- 5 wall to the right leg.
- 1 6. (Withdrawn) A rebar spacer as in claim 5 wherein,
- The center wall has feet extending below the wall.
- 1 7. (Withdrawn) A rebar spacer as in claim 2 wherein,
- 2 the flat base has feet thereunder.

- 1 8. (Withdrawn) A rebar spacer as in claim 1 wherein,
- 2 the base portion has a flat base thereunder, the flat base has a left wall, a right
- 3 wall and a cross wall extending between the left and right walls with the clip integral with
- 4 the cross wall such that the "U" shaped rebar receiving portion receives the rebar between
- 5 the left and right walls.
- 1 9. (Withdrawn) A rebar spacer as in claim 8 wherein,
- 2 the base has feet thereunder.
- 1 10. (Withdrawn) A rebar spacer as in claim 8 wherein,
- 2 the flat base has a portion of the base between the left and right walls removed.

1982

- 1 11. (Withdrawn) A rebar spacer as in claim 10 wherein,
- 2 the base has feet thereunder.
